NEWS LETTER

Department of Information Technology
KGiSL Institute of Technology
July 2018 Issue

DEPARTMENT VISION

To become a centre of excellence in education and research in the field of information technology by providing industry embedded education to the students for creating transformative impact on the requirements of nation.

DEPARTMENT MISSION

M1: To provide necessary infrastructure and facilities in a conducive environment for effective learning and smoother conduct of the program.

M2: To achieve effective teaching learning process by providing experienced, qualified and dedicated faculty members.

M3: To impart value based education to encourage the students towards higher education, research and development activities.

M4: To inculcate an attitude of self-learning, lifelong learning, problem solving ability, creative thinking, individual and team work with professional, ethical and moral values

M5: To prepare students for careers in industry, encourage entrepreneurship and mould them to take leadership for the betterment of the society.

MESSAGE FROM HOD

Individual commitment to a group effort- that is what makes a perfect team, a company, a society and a civilization work. I feel proud that another edition of the newsletter has been released for the department of Information Technology. Every start has to come to an end, but when it comes to both, start and end hasn't been easy. It is so difficult to start properly and finish perfectly. What counts the perspective is the way in which we initiate and perform the task. I am glad that the faculties and students have ultimately have done their duties and errands to elevate the department events. I appreciate them for bringing the inevitable programs in sight. There we enclose the events in this newsletter.
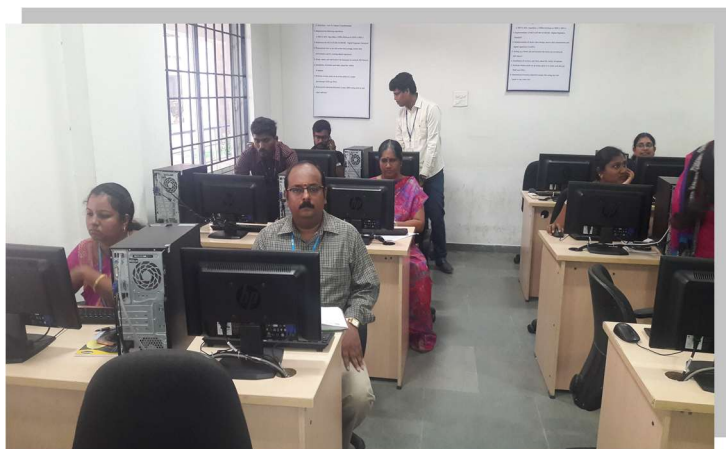

TRAINING

Real Time Challenges for Teachers

A teacher can be a good role model for a student who can inspire them to live a better life in various means. At the same time, the life of a teacher is not that flawless like everyone thinks it is. Like every other career, teachers are also facing a lot of challenges. Though, good cooperation from students, parents as well as school administrators can help them to overcome most of the hassles they face and come out successful. Lack of teamwork, minimal personal time, working towards long term goals, arguments and student excuses are among some serious challenges they face in a classroom. Addressing these common problems can not only help to improve teacher retention rate but also enhances success rates of student and the ultimate quality of education. The overall involvement of the participants was good. The session was interactive and useful which was held on 21st of April 2018 by Dr.Elamurugan.

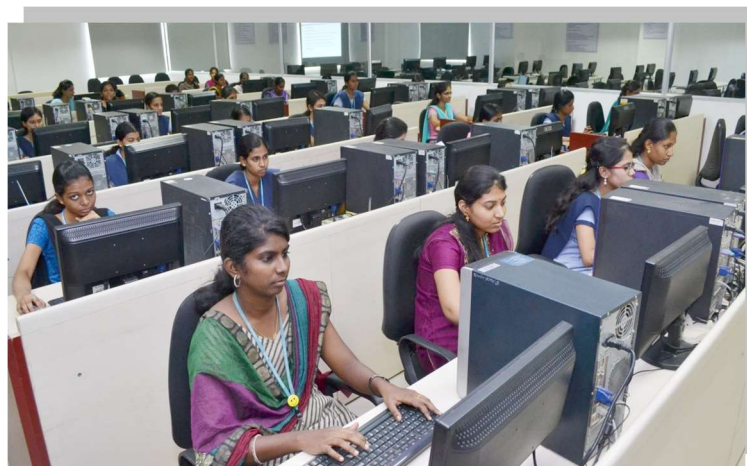

Classroom Management

Department of IT has organized a training program in Classroom management exclusively on 26th June 2018 in the presence of Dr.Elamurugan, Head/FDP, KiTE. The object of the workshop is collective learning that was adequately efficient in the relevant arena.

SAP

A guest lecture was conducted on 24 March 2018, by IT Department, on SAP by Mr.Jaydeep Chatterjee, He was the Vice president at KGiSL Pvt.Ltd, Coimbatore, India. Almost 30 students attended the session. They were advised to be exceptional and innovative in the project so as to have an edge over others during interview sessions. The involvement was very interactive and students were able to understand the industry expectations. The technicality of the concept was also explained via an inspiring video that the thought processing skills of the candidates were fine-tuned. The overall involvement of the participants was commendable as they were convoluted in the discussions. The session was interactive and informative. The SAP is essential in the organization to run the entire businesses smoothly, and thus they should know their transition drive. The organization should keep the few points in mind like how to manage the business variations and changes, the different ways in which the existing ERP system can be coordinated with the new SAP systems, testing that should be automated to validate the end-state. The overall involvement of the participants was commendable as they were convoluted in the discussions. The session was interactive and informative.

3D Animation and Game Development

A Workshop on 3D Animation and Game Development was organized by Information Department which was held on 05-06-2018 at KITE Campus. The workshop provides the Guide to learning 3D Animation and Modeling with Blender to Set the Way to Creating Awesome 3D Artwork. At the end of course, students will know the basics and the more advanced skills to masterfully navigate and create their own works of 3D art. Students will feel confident navigating around Blender and the different tools to use and what they do and will also be able to create their own characters and animation scenes and know all the different steps that it. The workshop gives the insight into how to design games across genres and development platforms. It covers all the fundamental of the game design from conceptualizing a game idea to finally publishing and offering it as a service.
